Publications in Reviewed Journals

[Ref. 125 and 139 are possibly the second and third most cited papers at UNC-CH Chemistry: >9838 and >7903 times, resp; WOS 1/16/2017. Both papers have about 1500 more citations each in Google Scholar. Mathematician Tom Darden was the “genius” behind them. Ulli Essemann (a phd student w. Max Berkowitz) took a lead role on the second and Darrin York (a g. student with me) contributed significantly to the first. JLT fairly points out, however, that some of the other papers are “dogs”; Ref. 261 (a book with Charles S. Johnson, Jr.) is a Dover Classic.) and therefore may not be a “dog”. Some of my publications are cited as L. Pedersen, some as LG Pedersen and others as L Pederson]
